

BAB V

KESIMPULAN DAN SARAN

A. Kesimpulan

Dalam memberikan asuhan keperawatan kepada An. A dengan Epithelioid Angiosarkoma di Ruang Kartika 2 RSUP Dr. Sardjito Yogyakarta selama 3 hari mulai hari Senin tanggal 3 Juni sampai hari Rabu tanggal 5 Juni 2024, peneliti menegakkan 6 diagnosa, yaitu; risiko perdarahan dibuktikan dengan efek agen farmakologis teratasi sebagian; inkontinensia fekal berhubungan dengan pascaoperasi pull through (stoma) belum teratasi; risiko infeksi dibuktikan dengan penyakit kronis, imunosupresi teratasi sebagian; gangguan rasa nyaman berhubungan dengan efek samping kemoterapi, program pengobatan hospitalisasi teratasi sebagian; risiko jatuh dibuktikan dengan kekuatan otot menurun teratasi sebagian, dan; gangguan mobilitas fisik berhubungan dengan penurunan kekuatan otot belum teratasi

B. Saran

1. Bagi Institusi Pendidikan

Dari hasil penelitian ini dapat dijadikan bahan referensi untuk perkembangan ilmu pengetahuan ke depannya

2. Bagi Rumah Sakit

Diharapkan rumah sakit dapat mempertahankan dan meningkatkan pelayanan dalam memberikan kepuasan bagi pasien baik sarana maupun prasarana di RSUP Dr. Sardjito Yogyakarta

3. Bagi Peneliti Selanjutnya

Diharapkan penelitian ini menambah pengetahuan dalam melakukan asuhan keperawatan secara komprehensif pada pasien dengan Epithelioid Angiosarkoma
